 - b. You will usually see more than one '**onSpot**' signal- if you have trouble connecting to one or the performance is poor, please continue to try the other available signals until you find the best one for your location.
2. Once you click on the name of the network you will be prompted to enter a security key (Windows) or password (Apple)- here you will enter '**onspotwifi**' (all lower case, no spaces)
3. Now you have a secure connection to onSpot wifi.
4. Now you need to open a browser to access the internet- open Firefox, Chrome, Internet Explorer, Safari, etc.
5. If you have any trouble with the above steps, please see the FAQs on the back of the **onSpot** brochure card. If you need additional help, please call or text **954.990.0192** or email **support@onspotwifi.com**
